

Cylinder Blocks

Learning Outcomes

- Develop pincer grip
- Develop visual discrimination of dimensions
- Become aware of dimension in negative space
- Develop one-to-one correspondence
- Develop the ability to compare
- Develop the concepts of large and small
- Develop the concepts of tall and short
- Develop the concepts of wide and narrow
- Develop the concepts of shallow and deep
- Develop the concepts of thick and thin

Indirect Outcomes

- Become aware of the comparative qualities leading to intelligent observation and ordering of the environment
- Prepare for handwriting
- Prepare for mathematics

Materials

- Block 1: Cylinders vary in breadth-that is, they proceed from thick to thin
- Block 2: Cylinders vary in both height and breath-that is, they proceed from large to small.
- Block 3: Cylinders vary in both height and breadth, but inversely. That is, they proceed from short and wide to tall and thin.
