

# Sound Cylinders

## Learning Outcomes

- Develop the ability to match
- Become consciously aware of the dynamic quality or volume of sound
- Develop the concepts of loud and soft
- Develop auditory discrimination

## Indirect Outcomes

- Prepare for the study of language
- Prepare for the aesthetics use of sound

## Materials

- There are two boxes, each containing a set of six hollow, wooden cylinders of the same size, one set with red and the other with blue tops. All cylinders of one set produce a different sound ranging from loud to soft. Each sound is produced by a pair of cylinders one from each set
